

What is claimed is:

1. An assembly, comprising:
 - a patio umbrella having a pole;
 - a lighting structure having:
 - 5 a battery housing;
 - a hollow support having a first end attached to the battery housing, and a second end;
 - a light bulb removably attached to the second end of the hollow support;
 - 10 wiring extending through the hollow support and having a first end positioned in the battery housing and a second end coupled to the light bulb;
 - and
 - means for removably attaching the battery housing to the pole.
- 15 2. The assembly of claim 1, further including a switch coupled to the wiring.
3. The assembly of claim 1, wherein the lighting structure further includes a bulb holder attached to the hollow support, and a globe removably attached to the
20 bulb holder and covering the light bulb.
4. The assembly of claim 1, wherein the attaching means has a first piece and a second piece that are removably attached to each other about the pole, with the first piece removably attached to the battery housing.
25
5. The assembly of claim 4, wherein each of the first and second pieces has a semi-circular configuration.
6. The assembly of claim 4, wherein the battery housing has a groove,
30 and the first piece has an extension that is removably received in the groove.

7. An assembly, comprising:
a patio umbrella having a pole;
a lighting structure having:
5 a battery housing;
a hollow support having a first end attached to the battery housing, and
a second end;
a light bulb removably attached to the second end of the hollow
support;
10 wiring extending through the hollow support and having a first end
positioned in the battery housing and a second end coupled to the light bulb;
a switch coupled to the wiring;
a bulb holder attached to the hollow support; and
a globe removably attached to the bulb holder and covering the light
15 bulb; and
means for removably attaching the battery housing to the pole.
8. The assembly of claim 7, wherein the attaching means has a first piece
and a second piece that are removably attached to each other about the pole, with
20 the first piece removably attached to the battery housing.
9. The assembly of claim 8, wherein each of the first and second pieces
has a semi-circular configuration.
- 25 10. The assembly of claim 8, wherein the battery housing has a groove,
and the first piece has an extension that is removably received in the groove.
